

Question 8. *Provide copies of all draft and final reports of any engineering studies or analyses conducted by IPA/APSC, or its contractors, to assess potential SO₂ reduction systems for Units 1 & 2, including, but not limited to, the scrubber wall rings, in the five years prior to the installation of scrubber wall rings on Units 1 & 2 at the facility.*

The installation of the wall rings was based on the results from the Pet Coke Test Burn. A copy of the test report is included with this response.

This response was prepared by IPSC employee Jerry Hintze.
